Q2 2026 Fund Commentary

Commentary and opinions are provided by Mackenzie Investments.

Market commentary

Canada's economy stayed under pressure in the second quarter as trade uncertainty continued to weigh on business confidence, though the labour market showed signs of stabilizing. Employment picked up in May, and the unemployment rate eased to 6.6%. Inflation accelerated, with the annual pace rising to 3.2% in May from 2.8% in April, as higher gasoline prices linked to the conflict in the Middle East pushed up energy costs. Core inflation measures held closer to 2%.

The Bank of Canada (BoC) held its policy rate at 2.25% at both its April and June meetings, its fourth and fifth consecutive holds. The BoC said it was looking through the temporary effect of higher energy prices while watching for signs that price pressures were becoming more persistent, and it pointed to risks on both sides from the trade dispute with the U.S. and the energy shock.

Canadian equities advanced in the second quarter. The S&P/TSX Composite Index climbed to a record high in June, extending its gain for the year to about 10%. The energy sector was a standout early in the quarter as crude oil prices stayed elevated, and most sectors ended higher. The Materials sector was down as gold prices retreated sharply after their earlier record run. Market leadership broadened as the quarter progressed and oil prices eased.

Performance

p>Underweight exposure to materials and stock selection in materials and energy contributed to performance. Selection within industrials also contributed to performance.

Overweight exposure to Manulife Financial Corp. and iA Financial Corp. Inc. contributed to performance. Manulife reported double-digit growth in core earnings per share and new business contractual service margin. A holding in iA Financial posted double-digit core earnings-per-share growth, record segregated fund sales and strong business retention.

Underweight exposure to financials detracted from performance. Stock selection in consumer discretionary and consumer staples detracted from performance.

Lack of exposure to The Bank of Nova Scotia and overweight exposure to Agnico Eagle Mines Ltd. detracted from performance. Bank of Nova Scotia's shares rose after it posted stronger second-quarter earnings, revenue growth and return on equity. Agnico Eagle was affected by a pullback in gold and gold equities. Higher energy prices raised inflation concerns and expectations for higher interest rates, which weighed on gold.

Portfolio activity

The sub-advisor added South Bow Corp. to the Fund. Dollarama Inc., Keyera Corp., CGI Inc., Canadian Pacific Kansas City Ltd. and Brookfield Asset Management Ltd. were increased.

A consumer staples holding was sold. Teck Resources Ltd., Agnico Eagle Mines Ltd., Cenovus Energy Inc., TC Energy Corp. and iA Financial Corp. Inc. were reduced.

September 30, 2026

*For Partner series and Preferred partner series an advisory and management services (AMS) fee, of between 0.50% and 1.25%, is negotiated between you and your advisor. The MER doesn't include this fee.

Canada Life is currently waiving a portion of the investment management fees on the High Interest Savings fund to target an estimated management expense ratio of 1.00%. Canada Life is not obligated to continue waiving these fees and it may cease to do so at any time without notice.

The 7-day annualized yield is based on the annualized total return of the fund over the past seven calendar days and does not represent an actual one-year return. It's important to note that 7-day annualized yield is not an indicator of future performance of the fund.

^Deferred Sales Charge (DSC) purchase option is not available for new contributions given regulatory bans that came into effect June 1, 2023. For certain policies where DSC is the only sales charge option available, new contributions may be accepted. Additional disclosure may be required.

†Soft capped - Contributions are no longer accepted to new investors., ‡Hard capped - Contributions are no longer accepted.
