Q2 2026 Fund Commentary

Commentary and opinions are provided by Mackenzie Investments.

Market commentary

Canada’s economy stayed under pressure in the second quarter as trade uncertainty continued to weigh on business confidence, though the labour market showed signs of stabilizing. Employment picked up in May, and the unemployment rate eased to 6.6%. Inflation accelerated, with the annual pace rising to 3.2% in May from 2.8% in April, as higher gasoline prices linked to the conflict in the Middle East pushed up energy costs. Core inflation measures held closer to 2%.

The Bank of Canada (BoC) held its policy rate at 2.25% at both its April and June meetings, its fourth and fifth consecutive holds. The BoC said it was looking through the temporary effect of higher energy prices while watching for signs that price pressures were becoming more persistent, and it pointed to risks on both sides from the trade dispute with the U.S. and the energy shock.

Canadian equities advanced in the second quarter. The S&P/TSX Composite Index climbed to a record high in June, extending its gain for the year to about 10%. The energy sector was a standout early in the quarter as crude oil prices stayed elevated, and most sectors ended higher. The Materials sector was down as gold prices retreated sharply after their earlier record run. Market leadership broadened as the quarter progressed and oil prices eased.

Performance

Stock selection in industrials and utilities contributed to performance. Exposure to The Toronto-Dominion Bank (TD Bank), Royal Bank of Canada, National Bank of Canada and Aritzia Inc. contributed to performance. Both TD Bank and Royal Bank reported strong earnings results and resilient capital levels. National Bank’s stock was supported by strong financial results and a dividend increase. Aritzia posted good results and continued sales momentum.

Stock selection in materials and information technology detracted from performance, as did positioning within information technology. Lack of exposure to The Bank of Nova Scotia, overweight exposure to Alamos Gold Inc. and a holding in OR Royalties Inc. detracted from performance. Bank of Nova Scotia’s shares rose after it posted stronger earnings and raised its dividend. Both Alamos Gold and OR Royalties, saw their shares lag peers despite solid operating results.

Portfolio activity

The sub-advisor added new holding in the materials and energy sectors. TFI International Inc. was added to gain exposure to transportation and logistics. Materials exposure was increased through Teck Resources Ltd. while financials exposure was increased through Intact Financial Corp. Waste Connections Inc., Enbridge Inc. and Dollarama Inc. were increased to raise exposure to industrials, energy and consumer sectors, respectively.

Capstone Copper Corp., Boyd Group Services Inc. and CGI Inc. were sold. Artemis Gold Inc. was reduced to manage the position size with the Fund’s gold exposure.

*For Partner series and Preferred partner series an advisory and management services (AMS) fee, of between 0.50% and 1.25%, is negotiated between you and your advisor. The MER doesn't include this fee.

Canada Life is currently waiving a portion of the investment management fees on the High Interest Savings fund to target an estimated management expense ratio of 1.00%. Canada Life is not obligated to continue waiving these fees and it may cease to do so at any time without notice.

The 7-day annualized yield is based on the annualized total return of the fund over the past seven calendar days and does not represent an actual one-year return. It's important to note that 7-day annualized yield is not an indicator of future performance of the fund.

^Deferred Sales Charge (DSC) purchase option is not available for new contributions given regulatory bans that came into effect June 1, 2023. For certain policies where DSC is the only sales charge option available, new contributions may be accepted. Additional disclosure may be required.

†Soft capped - Contributions are no longer accepted to new investors., ‡Hard capped - Contributions are no longer accepted.

Distribution of the chart, history standard and short-term reports are not permitted without including the fund profile long-term report. A description of the key features of Canada Life's individual variable insurance contract is contained in the information folder, available from your advisor. Any amount that is allocated to a segregated fund is invested at the risk of the policyowner and may increase or decrease in value. FundGrade A+® is used with permission from Fundata Canada Inc., all rights reserved. The annual FundGrade A+® Awards are presented by Fundata Canada Inc. to recognize the "best of the best" among Canadian investment funds. The FundGrade A+® calculation is supplemental to the monthly FundGrade ratings and is calculated at the end of each calendar year. The FundGrade rating system evaluates funds based on their risk-adjusted performance, measured by Sharpe Ratio, Sortino Ratio, and Information Ratio. The score for each ratio is calculated individually, covering all time periods from 2 to 10 years. The scores are then weighted equally in calculating a monthly FundGrade. The top 10% of funds earn an A Grade; the next 20% of funds earn a B Grade; the next 40% of funds earn a C Grade; the next 20% of funds receive a D Grade; and the lowest 10% of funds receive an E Grade. To be eligible, a fund must have received a FundGrade rating every month in the previous year. The FundGrade A+® uses a GPA-style calculation, where each monthly FundGrade from "A" to "E" receives a score from 4 to 0, respectively. A fund's average score for the year determines its GPA. Any fund with a GPA of 3.5 or greater is awarded a FundGrade A+® Award. For more information, see www.FundGradeAwards.com. Although Fundata makes every effort to ensure the accuracy and reliability of the data contained herein, the accuracy is not guaranteed by Fundata.
