## Q1 2026 Fund Commentary

*Commentary and opinions are provided by Mackenzie Investments.*

### Market commentary

Canada's economy navigated a challenging first quarter as trade uncertainty continued to weigh on business confidence and manufacturing activity. Employment fell in January and February before stabilizing in March, and the unemployment rate held steady at 6.7%. The outbreak of the conflict in the Middle East in late February added another layer of uncertainty, driving energy prices sharply higher and raising concerns about global inflation.

Monetary policy remained on hold in both Canada and the U.S. throughout the quarter. The Bank of Canada held its policy rate at 2.25% at both its January and March meetings, and the U.S. Federal Reserve Board maintained the federal funds rate at 3.50%–3.75% at the same meetings. Canada's unemployment rate was 6.7% in March, and the U.S. rate was 4.3%.

The Canadian fixed income market delivered mixed results in the first quarter as geopolitical uncertainty and rising oil prices complicated the investment landscape. The yield on the 10-year Government of Canada bond rose from 3.43% at the start of the quarter to 3.47% by quarter-end, reaching a high of 3.58%, putting downward pressure on government bond prices, particularly late in the quarter. Corporate bonds showed resiliency, but underperformed government bonds with credit spreads widening slightly.

North American equity markets diverged. Canadian equities rose about 4% as the energy sector surged on higher oil prices, with materials also contributing because of record gold prices early in the quarter. U.S. equities declined, with the S&P 500 Index falling about 4.4% as large-cap technology stocks led the retreat amid rising inflation concerns. The energy sector was a bright spot in the U.S. market as well, while smaller-capitalization and defensive companies outperformed the broad index.

### Performance

An allocation in the information technology sector and stock selection in the consumer discretionary sector contributed to the Fund's performance. Ovintiv Inc. and Linde PLC were the top individual contributors to performance .

Allocations to the energy and materials sectors detracted from the Fund's performance. Cenovus Energy Inc. and Mastercard Inc. were the top individual detractors from performance. .

### Portfolio activity

The sub-advisor added Province of Ontario (3.90%, 2036/06/02) and Suncor Energy Inc. The sub-advisor increased Videotron Ltée (4.65%, 2029/07/15). .

Ultra U.S. T-Bond (CBT) Mar 26 and BCI QuadReal Realty (1.073%, 2026/02/04) were sold. AtkinsRéalis Group Inc. was reduced. .

\*For Partner series and Preferred partner series an advisory and management services (AMS) fee, of between 0.50% and 1.25%, is negotiated between you and your advisor. The MER doesn't include this fee.

Canada Life is currently waiving a portion of the investment management fees on the High Interest Savings fund to target an estimated management expense ratio of 1.00%. Canada Life is not obligated to continue waiving these fees and it may cease to do so at any time without notice.

The 7-day annualized yield is based on the annualized total return of the fund over the past seven calendar days and does not represent an actual one-year return. It's important to note that 7-day annualized yield is not an indicator of future performance of the fund.

<sup>^</sup>Deferred Sales Charge (DSC) purchase option is not available for new contributions given regulatory bans that came into effect June 1, 2023. For certain policies where DSC is the only sales charge option available, new contributions may be accepted. Additional disclosure may be required.

<sup>†</sup>Soft capped - Contributions are no longer accepted to new investors., <sup>‡</sup>Hard capped - Contributions are no longer accepted.
